

Vehicle Tracking and Communication Platform by WebTech

The WebTech 6000 is a feature-rich locator device at the heart of WebTech's Quadrant Vehicle Services System™. Quadrant is a web-based system that provides mapping and reporting to optimize fleet management. It drives four critical mobile application areas for fleets and mobile workforces:

- Vehicle Tracking
- Internet Access
- Communications (messaging & voice)
- Telemetry Monitoring

The WebTech 6000 provides vehicle monitoring capabilities 24 hours a day, 7 days a week. The locator is fully configurable over-the-air and is remotely supported

Optional Features

Additionally, the WebTech 6000 also supports the following options:

Telemetry Port

- Vehicle monitoring & control capabilities (temperature sensing, door lock/unlock, engine immobilization, panic buttons etc.)

Internal Battery

- Support asset and trailer tracking applications, with auto-recharging capabilities. Also suited for tamper-proof installations (receive notification when main power source has been disconnected)

Voice

- Hands free kit

The WebTech 6000 Locator is designed and manufactured by WebTech Wireless. It enables your vehicles to achieve increased productivity and streamline your operations with services that include the following:

Location Services

In-Vehicle Navigation
GPS Tracking
Geofencing
Mapping
Reporting

Internet Services

Email
Internet Access
Enterprise Connectivity
Credit Card Validation
Maintenance Scheduling

Communication Services

Two-Way Messaging
Digital Forms
Voice

Telemetry Services

Door Lock/Unlock
Engine Immobilization
J1708 Monitoring
Temperature Monitoring

J1708 Capability

- View vehicle and/or Driver Performance statistics utilising metrics captured via the J1708 vehicle diagnostic interface (Fuel usage, RPMs, Hard Braking)

Navigation

- Utilise the WT 6000's GPS NMEA port to enable in-vehicle mapping and turn by turn instructions from a laptop or hand held

Employ the power of the WebTech 6000 for the efficient operation of your fleet. Increase your mobile workforce productivity, lower your operating costs and improve the safety and security of your mobile assets.

New & Enhanced Fleet Services

The WebTech 6000 supports the following features:

GPS-based location and status reporting on GSM/GPRS networks

- Store and forward capability – store up to 2000 records
- SBAS/WAAS/EGNOS GPS – based location accuracy
- Real-time vehicle tracking and status monitoring

Multiple geofences on specific landmarks/locations

- Up to 60 geofences can be assigned for each vehicle
- Receive alerts when vehicle enters or exits specifically-defined geofences

Over-the-air configuration & upgrades

- Modify your locator functionality quickly and easily
- Reduce the cost to upgrade your locator with remote support capability

Internet access over GSM/GPRS/cellular networks

- Supports end-to-end Internet-based applications on laptops or PDAs
- Provides an "always-on" high speed GPRS connection
